

Ecole Centrale Paris will participate in the India-France Technology Summit

(Paris, October 21st 2013) - Ecole Centrale Paris will participate in the first edition of the **India-France Technology Summit** which will take place on October 23rd and October 24th, 2013 in New Delhi.

A veritable showcase of French technological know-how, the aim of this Summit is to encourage technological and commercial exchanges between France and India. This Summit will provide France greater visibility in terms of research, development and innovation as well as enable the commercialization of new products and services (technology transfer, joint R&D projects, market access). It will also be an opportunity for the French public and private sector stakeholders to give demonstrations of their most recent innovations and directly interact with their potential partners for sharing and developing new technologies.

Settled in India through four academic partnerships developed with IISc Bangalore, IIT New Delhi, IIT Mumbai, IIT Kanpur and with **Mahindra Ecole Centrale** created with Tech Mahindra and JNTU (announced last September), Ecole Centrale Paris will have the opportunity to promote its academic model and his knowledge in the field of engineering sciences.

This event will allow Centrale Paris to develop new synergies in bilateral collaborations with Indians or International companies settled in India focused on science education, new technology and innovation subjects.

India-France Technology Summit
23 & 24 October, From 9am to 7pm
Lalit Hotel, Barakhamba Avenue, Connaught Place, New Delhi.
